### IDC Web-Enabled Carbon Management Ethernet & GSM/GPRS options available

The IDC offers the most comprehensive range of meter interfaces available:

- Connects to most CoP5 meters including Elster & PRI via 1107 port or serial adapter
- RS485 Modbus allowing connection to panel mounted sub-meters
- 8 channel Modbus logger to monitor conventional pulsing utility meters
- Optional radio receiver for remote reading via Radio-Tech transmitters

Data is collected through the Ethernet network or via a GSM/GPRS by our server software. Data and reports can be viewed and downloaded from our secure website or can be distributed by email. A desktop version of the software is available for SME customers.
